

# JAIME PARDO

WEB DEVELOPER

## ABOUT ME

As a programmer, I can say that I am a jack of all trades but a master of none. I believe that every Programming Language may differ in syntax, but it all has the same logic. I am willing to learn anything related to my field that will help improve my skills and knowledge. I also love criticism because it helps me see things from a new perspective that will be beneficial for my growth.
